THE ROLE

As a junior hardware technician, you will work alongside experienced technicians and computer engineers on building, testing, and trialing hardware.

You will have hands-on exposure to the detailed components of hardware construction and be a part of technology development from early conception to final deployment.

This role is for you if you have...

- ✓ an inquisitive mind interested in how hardware works and how new hardware is constructed.
- ✓ genuine interest in areas of engineering, computer engineering, systems design, computing, software and/or hardware.
- ✓ ambition to develop your career in the fast-growing, technology sector.

EDUCATIONAL BENEFIT

All candidates will be required to undergo a boot-camp style 2-3 week training session remotely. This training is provided by Sollers College and qualifies for college level credits helping candidates expand their resume with technology related education.

Candidates have an option to work towards an Associate Degree, alongside their fulltime employment as part of our work-to-learn program. Initial and ongoing training and the work experience itself will contribute to the qualification in the form of college credits.

This is an optional opportunity for those looking to advance their education.

This program is designed to maximize participants' growth and requires studying outside full-time work hours. We ask all applicants to evaluate their goals and lifestyle against the dedication and time-commitment needed to succeed in this program.

NEXT STEPS

If you are interested, we encourage you to...

- ① Ensure you have read this job description in full
- ② Discuss questions and considerations with your Ufini advisor
- ③ Review Mindtree, the employer (www.mindtree.com)
- ④ Discuss the opportunity with your support network (ex. family, teacher, guidance counselor) to make sure it's right for you.

If you choose to proceed with your application, inform your Ufini advisor schedule a discussion with Mindtree (the employer) and Sollers College (the training provider).
